TECHNOLOGIES

Html 5
Css 3
Less
Javascript
Jquery
React
Python
Django
Bootsrap

APPLICATIONS

Fireworks
Photoshop
Illustrator
Figma
Atom
Github
Gitlab

WORK EXPERIENCE

Support Engineer | Dec 2015 - Feb 2016
Prop Data

I started off at Prop Data as a support engineer where I would be responsible for answering queries, taking phone calls, dealing with any situations that are thrown at you in any given moment and trying to find the most suitable solutions for the client. Spending time in support has given me a lot of knowledge on how to deal with clients order processes within the workplace.

Frontend Developer | Feb 2016 - Present
Prop Data

My role at Prop Data is one that is given a lot of responsibility in terms of deadlines and new ways to do things. On a daily basis I create web applications, newsletters, email stationary and custom alerts which need to be fully functional as well as to incorporate new technologies and ways of doing things.

As well as developing front end applications I do a lot of programming within my current job: creating custom template tags, setting up jobs for newsletter sends and adding new functions to the current backend product at work.

I have learnt a lot within this role, redifined the way I think about the work that I am doing and have grown as a web developer and programmer.

EDUCATION

Waterfall College Highschool | 2013 - 2015
Mathematical Literacy, English, History, Business Studies, Consumer Studies, Tourism & Life Orientation

Damelin | 2017 - 2020
Bachelor of Commerce in Information Management
